

How to check a Digital iD™

Australia Post Digital iD™ is an acceptable form of photo ID. A person can present it on their phone to prove who they are, face-to-face.

Here's how to check a Digital iD™ with a verified photo

Step 1: Check the Digital iD™

- A photo is shown on the screen.
- The person's face matches the photo.
- The  Verified symbol appears.

Step 2: Scan the QR code

Scanning is the safest way to verify that it's a genuine Digital iD™.

- Scan the QR code using a phone or tablet with the Digital iD™ app.
- Check that it matches the person's details.

Want to use your own scanning solution?
Contact us at developers@digitalid.com

Can't scan?

If you're not able to scan, ask the person to tap the screen – the ID background should start moving.
